DID YOU KNOW??

It's a Fact!!

Tigers have striped skin not just striped fur.

Reindeer eat moss because it contains a chemical that stops their body from freezing.

Dolphins sleep with one eye open!

In Siberia they created a new kind of 'Fennec fox' that is just like a dog - it is friendly and loyal. It wags its tail and it barks. It is a very good pet.

An ostrich's eye is bigger than its brain.

Beavers can hold their breath for 45 minutes under water.

Camels have three eyelids to protect themselves from blowing sand.

Mini pigs are very popular pets in Japan now. They are very small, nice, fat and clever. They know how to "sit" and "stay". Mini pigs are real friends.

The Chameleon can focus its eyes separately to watch two objects at once.

Elephants are the only animals that can't jump.

Kangaroos cannot walk backwards.

The Basenji is the only dog which does not bark.

Snakes can see through their eyelids.

Penguins can jump 6 feet in the air.

Polar bears are left handed.

Butterflies taste sensors are in their feet. They taste their food by standing on it.
